

RAW MATERIAL WARRANTY

ROTOTEC S.p.A. hereby guarantees that all of its range of products is made of **Linear Polyethylene (LLD-PE)** using the rotational moulding technique.

ROTOTEC S.p.A guarantees that the raw material is:

- 100% virgin: recycled PE is **NOT** used.
- Totally atoxic: **suitable** for contact with drinking water (see Declaration of Conformity).
- 100% recyclable: **total** respect for the environment.
- Anti-algae: the use of **anti-UV additives** prevents the formation of algae and ensures maximum resistance, **NO** deterioration over time.
- Inert: in the presence of chemical and physical atmospheric agents and **chemical substances** in the ground.

Rototec S.p.A. products, made of first class raw material, are guaranteed also for these technical features:

- Robustness: suitable to support **significant changes** in temperature from - 20 to + 80°C.
- Resistance: **excellent resistance** to most fluids and reagents (see Table of tank resistance).
- Strength: **one-piece structure** (= monobloc, **NO** welds) ensures the perfect water tightness and mechanical seal.
- Safety: the ease of handling and the lightweight nature of the products guarantee **absolute** safety on-site.
- Reliability: the **smooth** internal surface of the products makes them easy to clean and maintain.
